

## EDUCATION

---

- **National Yang Ming Chiao Tung University (NYCU)** Hsinchu, Taiwan  
*B.S. in Computer Science* 2022 – Present
- GPA: 4.03 / 4.3
- **Relevant Courses:** SDN & NFV, Network Programming, Network Systems Capstone, Cryptography Engineering, Computer Security Capstone, Artificial Intelligence

## SKILLS

---

- **Programming:** Python, C/C++, Java, Shell Script, C#
- **Tools & Platforms:** Docker, Git, PostgreSQL, Linux, WPF (XAML), FreeBSD
- **Networking & Security:** SDN (ONOS), NFV, OpenZiti (Zero Trust), Cryptography, ipfw, FRRouting

## EXPERIENCE

---

- **IT Center, Dept. of Computer Science, NYCU**  
*Teaching Assistant (WWW Group)* Feb. 2025 – Present
- Assist with website deployment, routine maintenance, and troubleshooting (e.g., Linux servers, version control).

## AWARDS

---

- **AI Workshop (NYCU, 112-2) – Most Creative Group**
- Developed a Homework Helper Bot using **RAG** (with Pinecone) and **ChatGPT 3.5 Turbo** for question answering. Integrated Notion API and Google Calendar API for automatic scheduling and note creation.

## PROJECTS

---

- **GemiHub** [GitHub Repo](#)
- Crowdsourcing-based AI application using **React Native** and **Gemini 1.5 Pro**. Integrated RAG for contextual insights from a centralized user-contributed corpus, improving query accuracy. Backend in **Python (FastAPI)**.
- **NYCUCSTIX** [GitHub Repo](#)
- High-traffic ticketing system built with **FastAPI**, **MongoDB**, and **React**. Implemented JWT-based authentication and employed **Selenium** for stress testing under heavy load.
- **SDN Virtual Router (Docker, Java, BGP)**
- Deployed an SDN network via **ONOS Controller** and Docker, integrated with FRRouting (BGP). Implemented proxy ARP, bridging, and intent-based services in Java to abstract SDN as a single virtual router.
- **OpenZiti Customization (C#, WPF)**
- Extended the **OpenZiti** Desktop Edge for Windows with custom UI/UX using **C#** and WPF (XAML), enhancing zero-trust networking features.
- **Web Services & NFS Firewall (Nginx, FastAPI, FreeBSD)**
- Configured **Nginx** (HTTPS + HSTS), **ipfw** firewall rules, and a **FastAPI + PostgreSQL** backend with load balancing. Implemented an **NFS server-client** architecture for centralized file sharing.
- **File Server & Backup (SFTP, FreeBSD, ZFS)**
- Built a secure file server with **SFTP** on FreeBSD. Configured **ZFS RAID10** for high-availability backup and developed shell scripts for dataset management and automated file filtering.

## EXTRACURRICULAR ACTIVITIES

---

- **NYCU Student Association**  
*Activities Department Member* Sep. 2024 – Present
- Assist in organizing campus-wide events such as music festivals and Christmas activities. Gained vendor coordination and stage planning experience.
